Urban and Regional Economics – Marxist Perspectives

Matthew Edel

Reviews the basic tenets of Marxist work on urban and regional development and its uses for the analysis of socioeconomic problems. Discusses the treatment of urban and regional issues by Marx, Engels and other early Marxists. Examines recent controversies concerning location and uneven spatial development, rent and urban segregation, urban service delivery, and the roles of the local state and community social movements.

Urban Transportation Economics

Kenneth A. Small

A comprehensive review of the economics of urban transportation. Presents mutually consistent models of demand, cost, pricing, investment criteria, and industrial organization, so that they can be combined to describe equilibria of the entire urban transportation system under various policies. Models are described with genuine empirical content and international data is used to demonstrate how the models can be applied.
